Thanksgiving

Stain Treatment Season Opens

Please call our office to schedule your treatment needs.

Reduce Your Energy Consumption

Cooler weather permits you to reduce your daily filtration time. Six to eight hours daily should be sufficient for non-heated pools. Use of solar or heater systems should be supported with a nine to twelve hour continuous daytime filtration cycle.

The Holiday Season is Here

Keep in mind our specific holiday non-service days are November 23-27, 2009, December 21-25, 2009, and January 1, 2009. All treatment protocols will be adjusted during the prior week to accommodate this schedule. All full service customers must insure they keep their skimmer baskets free of debris during the holiday season.

Pool Owners Five Most Important Basic Rules

Rule One: Safety is the pool owner's highest priority!

Rule Two: Don't forget Rule One!

Rule Three: Pool water chemistry must be in balance to be effective. However, this balance must also be in harmony with effective cleaning, filtration and equipment performance in a leak free environment!

Rule Four: Pool Love. Harmonious performance provides maximum safety, health and welfare for your family, friends, and pets while contributing to the useful life of pool components.

Rule Five: Non-swim season is the perfect time to schedule your pool repairs and maintenance needs. Schedule yours now by calling our office at **636-0903**.

Referral Special Extended through December 31, 2009

Everyone is familiar with our referral program, send us a new customer within our service area and get 1 month free service. December is double days! Send us a new customer within our service area and receive 2 free months of service! Conditions apply, call for details.
